

Alex Hermida

Software Engineer Manager

alex@alexhermida.dev | [Personal blog](#)

Currently		<p>I work inside a small team as a core developer of the open source project Taiga.io, developing new features in the backend with Python, in the frontend with AngularJS, giving support in Github as well as delivering new releases in production every month.</p> <p>I am an Agile development fan, and usually, I work as a scrum master or team facilitator looking for interactions between people, designing solutions and software simplicity.</p> <p>I love to learn and to improve my skills every day, so I collaborate in many local devs groups.</p>
Specialized in		<p>I do software development with Python and JS. I have extensive experience in managing teams and doing business process analysis with customers and users using agile methodologies. My main stack is open source technologies like Python, Django, PostgreSQL, VueJS, Ansible, Redis, RabbitMQ, MQTT or CentOS.</p>
Interests		<p>Python language and community, agile development, technology, community, diversity, computer security.</p>
