

# Alejandro Hermida

*Software Developer Manager*

[alexhermida@gmail.com](mailto:alexhermida@gmail.com) | [Personal blog](#)

Currently	I work inside a small team developing enterprise software and services. I am a Python developer, my main stack are open source technologies like PostgreSQL, Django, Ansible and VueJS. I am a agile development fan, I look for interactions between people and software simplicity. I usually work as scrum master or team facilitator. I love to learn and to improve my skills every day so I collaborate in many local devs groups.														
Specialized in	Software development and business process analysis using agile methodologies.														
Interests	Python language and community, agile development, technology, community, diversity, computer security.
