

Alejandro Hermida

Software Developer Manager

alexhermida@gmail.com | [Personal blog](#)

Currently	I work inside a small team developing enterprise software and services. I am a Python developer and in my main stack are open source technologies like PostgreSQL, Ansible, VueJS, Jenkins. I am a agile development fan, I look for interactions between people and software simplicity. I use to work as scrum master or team facilitator. I love to learn and to improve my skills every day so I collaborate in many local devs groups.														
Specialized in	Software development and business process analysis using agile methodologies.														
Interests	Python language and community, agile development, technology, community, diversity, computer security.
